Sarah Chen [00:00:00]

Good morning everyone, thanks for joining. Let's get started. Today we have two main topics — I want to cover the update on Sterling Capital Bank first and then we'll move to Nexus Pharmaceuticals. Sound good?

Nathaniel Cross [00:01:00]

Perfect. Yes, let's do that.

Sarah Chen [00:02:00]

So on Sterling Capital Bank — we're currently in Legal Review. I spoke with Nathaniel Cross on Wednesday and the feedback was positive overall. They're really focused on solving KYC automation. That's their number one priority right now.

David Kim [00:05:00]

Yeah I was on that call too. Nathaniel Cross specifically said and I'm quoting here — 'if MasterCRM can fix KYC automation we'll sign this quarter.' That's a direct quote. So we need to make sure our demo next week really hammers that use case.

Nathaniel Cross [00:08:00]

Agreed. What's the competitive situation? Are Microsoft Dynamics still in the picture?

Sarah Chen [00:09:00]

They submitted a proposal last week. Priced about fifteen percent below us. But Nathaniel Cross told me off the record that they prefer MasterCRM's implementation support model. So we shouldn't compete on price — we should stay focused on the service wrapper and the faster go-live timeline.

Sofia Marchetti [00:13:00]

On the technical side — Sterling Capital Bank's IT director raised a question about API rate limits last week. I sent over the Enterprise tier limits document. They need about 46k API calls per day which is well within our limits.

Sarah Chen [00:16:00]

Good. So action items on Sterling Capital Bank: David sends the API docs — done. I'll revise the proposal by Thursday with a stronger ROI section focused on KYC automation. And we need to lock in the exec sponsor call — Sarah, can you reach out directly to their CEO?

Sarah Chen [00:18:00]

I'll send a note today. I have a contact through the industry council so I can get a direct line.

Sarah Chen [00:19:00]

Perfect. Okay moving to Nexus Pharmaceuticals.

Nathaniel Cross [00:21:00]

So Nexus Pharmaceuticals — I'll take this one. We're at Pilot. The deal is worth \$630,000. Dr. Linda Zhao is our champion, Director of Commercial Operations. We've had three discovery calls and one full platform demo.

Sarah Chen [00:25:00]

What's the timeline looking like? Do we have a close date?

Nathaniel Cross [00:26:00]

Their fiscal year ends June 30. So they're motivated to close before then. Budget is confirmed — \$630,000 is approved. The main blocker right now is legal. Their counsel has questions about the data processing agreement. Specifically around sample tracking data and where it lives.

Sofia Marchetti [00:30:00]

We can handle that. We support US-only data residency and we have supplemental GDPR documentation if needed. I'll put together a data flow diagram for their legal team this week.

Nathaniel Cross [00:33:00]

That would be great. The other thing — Dr. Linda Zhao mentioned that they evaluated Veeva CRM two years ago and had a bad implementation experience. So we actually have an advantage there. We should reference our implementation NPS score in the next call.

Sarah Chen [00:36:00]

Good point. What's our current implementation NPS?

David Kim [00:37:00]

It's 71. Industry benchmark is around 41. That's a strong differentiator.

Sarah Chen [00:38:00]

Alright. Summary of actions: data flow diagram for Nexus Pharmaceuticals legal by Friday, implementation NPS slide added to deck, and I'll send a recap email to Dr. Linda Zhao with our legal response timeline. Any

other business before we close?

Nathaniel Cross [00:41:00]

I think that covers it. Good session everyone.

Sarah Chen [00:42:00]

Agreed. Thanks all. Talk Thursday.
