- Sarah Chen
- Marcus Webb
- Nathaniel Cross

Sofia Marchetti [00:00:00]

Good morning everyone, thanks for joining. Let's get started. Today we have two main topics — I want to cover the update on Sterling Capital Bank first and then we'll move to Titan Logistics Group. Sound good?

Sarah Chen [00:01:00]

Perfect. Yes, let's do that.

Sofia Marchetti [00:02:00]

So on Sterling Capital Bank — we're currently in Legal Review. I spoke with Nathaniel Cross on Thursday and the feedback was positive overall. They're really focused on solving KYC automation. That's their number one priority right now.

Marcus Webb [00:05:00]

Yeah I was on that call too. Nathaniel Cross specifically said and I'm quoting here — 'if MasterCRM can fix KYC automation we'll sign this quarter.' That's a direct quote. So we need to make sure our demo next week really hammers that use case.

Sarah Chen [00:08:00]

Agreed. What's the competitive situation? Are Microsoft Dynamics still in the picture?

Sofia Marchetti [00:09:00]

They submitted a proposal last week. Priced about fifteen percent below us. But Nathaniel Cross told me off the record that they prefer MasterCRM's implementation support model. So we shouldn't compete on price — we should stay focused on the service wrapper and the faster go-live timeline.

Nathaniel Cross [00:13:00]

On the technical side — Sterling Capital Bank's IT director raised a question about API rate limits last week. I sent over the Enterprise tier limits document. They need about 63k API calls per day which is well within our limits.

Sofia Marchetti [00:16:00]

Good. So action items on Sterling Capital Bank: David sends the API docs — done. I'll revise the proposal by Thursday with a stronger ROI section focused on KYC automation. And we need to lock in the exec sponsor call — Sarah, can you reach out directly to their CEO?

Sarah Chen [00:18:00]

I'll send a note today. I have a contact through the industry council so I can get a direct line.

Sofia Marchetti [00:19:00]

Perfect. Okay moving to Titan Logistics Group.

Sarah Chen [00:21:00]

So Titan Logistics Group — I'll take this one. We're at Closed Won. The deal is worth \$1,100,000. Marcus Webb is our champion, Director of Technology. We've had three discovery calls and one full platform demo.

Sofia Marchetti [00:25:00]

What's the timeline looking like? Do we have a close date?

Sarah Chen [00:26:00]

Their fiscal year ends June 30. So they're motivated to close before then. Budget is confirmed — \$1,100,000 is approved. The main blocker right now is legal. Their counsel has questions about the data processing agreement. Specifically around driver turnover tracking data and where it lives.

Nathaniel Cross [00:30:00]

We can handle that. We support US-only data residency and we have supplemental GDPR documentation if needed. I'll put together a data flow diagram for their legal team this week.

Sarah Chen [00:33:00]

That would be great. The other thing — Marcus Webb mentioned that they evaluated Oracle TMS two years ago and had a bad implementation experience. So we actually have an advantage there. We should reference our implementation NPS score in the next call.

Sofia Marchetti [00:36:00]

Good point. What's our current implementation NPS?

Marcus Webb [00:37:00]

It's 71. Industry benchmark is around 41. That's a strong differentiator.

Sofia Marchetti [00:38:00]

Alright. Summary of actions: data flow diagram for Titan Logistics Group legal by Friday, implementation NPS slide added to deck, and I'll send a recap email to Marcus Webb with our legal response timeline. Any other business before we close?

Sarah Chen [00:41:00]

I think that covers it. Good session everyone.

Sofia Marchetti [00:42:00]

Agreed. Thanks all. Talk Thursday.
