- Nathaniel Cross
- Jessica Park
- Sofia Marchetti

David Kim [00:00:00]

Good morning everyone, thanks for joining. Let's get started. Today we have two main topics — I want to cover the update on BlueSky Retail Group first and then we'll move to Sterling Capital Bank. Sound good?

Nathaniel Cross [00:01:00]

Perfect. Yes, let's do that.

David Kim [00:02:00]

So on BlueSky Retail Group — we're currently in Discovery. I spoke with Jessica Park on Friday and the feedback was positive overall. They're really focused on solving churn prediction. That's their number one priority right now.

Jessica Park [00:05:00]

Yeah I was on that call too. Jessica Park specifically said and I'm quoting here — 'if MasterCRM can fix churn prediction we'll sign this quarter.' That's a direct quote. So we need to make sure our demo next week really hammers that use case.

Nathaniel Cross [00:08:00]

Agreed. What's the competitive situation? Are Klaviyo still in the picture?

David Kim [00:09:00]

They submitted a proposal last week. Priced about fifteen percent below us. But Jessica Park told me off the record that they prefer MasterCRM's implementation support model. So we shouldn't compete on price — we should stay focused on the service wrapper and the faster go-live timeline.

Sofia Marchetti [00:13:00]

On the technical side — BlueSky Retail Group's IT director raised a question about API rate limits last week. I sent over the Enterprise tier limits document. They need about 57k API calls per day which is well within our limits.

David Kim [00:16:00]

Good. So action items on BlueSky Retail Group: David sends the API docs — done. I'll revise the proposal by Thursday with a stronger ROI section focused on churn prediction. And we need to lock in the exec sponsor call — Sarah, can you reach out directly to their CEO?

Nathaniel Cross [00:18:00]

I'll send a note today. I have a contact through the industry council so I can get a direct line.

David Kim [00:19:00]

Perfect. Okay moving to Sterling Capital Bank.

Nathaniel Cross [00:21:00]

So Sterling Capital Bank — I'll take this one. We're at Legal Review. The deal is worth \$2,300,000. Nathaniel Cross is our champion, SVP Technology. We've had three discovery calls and one full platform demo.

David Kim [00:25:00]

What's the timeline looking like? Do we have a close date?

Nathaniel Cross [00:26:00]

Their fiscal year ends June 30. So they're motivated to close before then. Budget is confirmed — \$2,300,000 is approved. The main blocker right now is legal. Their counsel has questions about the data processing agreement. Specifically around regulatory reporting data and where it lives.

Sofia Marchetti [00:30:00]

We can handle that. We support US-only data residency and we have supplemental GDPR documentation if needed. I'll put together a data flow diagram for their legal team this week.

Nathaniel Cross [00:33:00]

That would be great. The other thing — Nathaniel Cross mentioned that they evaluated Microsoft Dynamics two years ago and had a bad implementation experience. So we actually have an advantage there. We should reference our implementation NPS score in the next call.

David Kim [00:36:00]

Good point. What's our current implementation NPS?

Jessica Park [00:37:00]

It's 71. Industry benchmark is around 41. That's a strong differentiator.

David Kim [00:38:00]

Alright. Summary of actions: data flow diagram for Sterling Capital Bank legal by Friday, implementation NPS slide added to deck, and I'll send a recap email to Nathaniel Cross with our legal response timeline.

Any other business before we close?

Nathaniel Cross [00:41:00]

I think that covers it. Good session everyone.

David Kim [00:42:00]

Agreed. Thanks all. Talk Thursday.
