

Quarterly Business Review — Q2 2026

Reference: BRF-2026-4611 · Accounts: Acme Corporation & Titan Logistics Group · Prepared by: Sofia Marchetti

Acme Corporation — QBR Summary

Business Objectives Review

Acme Corporation entered Q2 with three primary objectives: address manual data entry, reduce manual overhead by 30%, and complete phase 1 of MasterCRM deployment. Progress against objective 1 is on track. Phase 1 go-live is scheduled for June 15, 2026. The team has completed 78% of configuration tasks as of today.

Usage and Adoption Metrics

Current licensed seat utilization: 87% of 1,200 seats. Daily active users: 61%. Top modules by usage: CRM Enterprise (88% adoption), Analytics Suite (59% adoption). Support ticket volume decreased by 21% vs Q1. NPS score: 53 (industry benchmark: 41).

Open Issues and Escalations

Two open tickets flagged as high priority: (1) SSO intermittent failures affecting 4 users — engineering patch scheduled for May 28, 2026; (2) data export performance degraded for large datasets — workaround provided, permanent fix in June release. No SLA breaches in Q2.

Q3 Goals

- Expand to API Access module
- Complete admin training programme
- Reduce no real-time reporting by 40%
- Achieve 90%+ seat utilization

Titan Logistics Group — QBR Summary

Business Objectives Review

Titan Logistics Group entered Q2 with three primary objectives: address last-mile visibility, reduce manual overhead by 30%, and complete phase 1 of MasterCRM deployment. Progress against objective 1 is on track. Phase 1 go-live is scheduled for June 15, 2026. The team has completed 78% of configuration tasks as of today.
