- Sarah Chen
- Robert Okafor

James Whitfield [00:00:00]

Good morning everyone, thanks for joining. Let's get started. Today we have two main topics — I want to cover the update on Greenfield Energy Partners first and then we'll move to Atlas Construction & Engineering. Sound good?

Chen Li [00:01:00]

Perfect. Yes, let's do that.

James Whitfield [00:02:00]

So on Greenfield Energy Partners — we're currently in Proposal Sent. I spoke with Amara Osei on Sunday and the feedback was positive overall. They're really focused on solving investor reporting. That's their number one priority right now.

Sarah Chen [00:05:00]

Yeah I was on that call too. Amara Osei specifically said and I'm quoting here — 'if MasterCRM can fix investor reporting we'll sign this quarter.' That's a direct quote. So we need to make sure our demo next week really hammers that use case.

Chen Li [00:08:00]

Agreed. What's the competitive situation? Are Salesforce Energy Cloud still in the picture?

James Whitfield [00:09:00]

They submitted a proposal last week. Priced about fifteen percent below us. But Amara Osei told me off the record that they prefer MasterCRM's implementation support model. So we shouldn't compete on price — we should stay focused on the service wrapper and the faster go-live timeline.

Robert Okafor [00:13:00]

On the technical side — Greenfield Energy Partners's IT director raised a question about API rate limits last week. I sent over the Enterprise tier limits document. They need about 53k API calls per day which is well within our limits.

James Whitfield [00:16:00]

Good. So action items on Greenfield Energy Partners: David sends the API docs — done. I'll revise the proposal by Thursday with a stronger ROI section focused on investor reporting. And we need to lock in the exec sponsor call — Sarah, can you reach out directly to their CEO?

Sarah Chen [00:18:00]

I'll send a note today. I have a contact through the industry council so I can get a direct line.

James Whitfield [00:19:00]

Perfect. Okay moving to Atlas Construction & Engineering.

Chen Li [00:21:00]

So Atlas Construction & Engineering — I'll take this one. We're at Closed Won. The deal is worth \$780,000. Robert Okafor is our champion, COO. We've had three discovery calls and one full platform demo.

James Whitfield [00:25:00]

What's the timeline looking like? Do we have a close date?

Chen Li [00:26:00]

Their fiscal year ends June 30. So they're motivated to close before then. Budget is confirmed — \$780,000 is approved. The main blocker right now is legal. Their counsel has questions about the data processing agreement. Specifically around subcontractor vetting data and where it lives.

Robert Okafor [00:30:00]

We can handle that. We support US-only data residency and we have supplemental GDPR documentation if needed. I'll put together a data flow diagram for their legal team this week.

Chen Li [00:33:00]

That would be great. The other thing — Robert Okafor mentioned that they evaluated Procore two years ago and had a bad implementation experience. So we actually have an advantage there. We should reference our implementation NPS score in the next call.

James Whitfield [00:36:00]

Good point. What's our current implementation NPS?

Sarah Chen [00:37:00]

It's 71. Industry benchmark is around 41. That's a strong differentiator.

James Whitfield [00:38:00]

Alright. Summary of actions: data flow diagram for Atlas Construction & Engineering legal by Friday, implementation NPS slide added to deck, and I'll send a recap email to Robert Okafor with our legal

response timeline. Any other business before we close?

Chen Li [00:41:00]

I think that covers it. Good session everyone.

James Whitfield [00:42:00]

Agreed. Thanks all. Talk Thursday.
